WHO AM I?

I'm a 19-year-old, 3rd year Computer Science student with a deep passion for video games. But for me, it has never just been about playing; I have always been fascinated by how games can make people feel so many different emotions and how each player experiences them in their own way. As I grew up, this curiosity pushed me to learn more about game development, and now I am working to build my skills to one day create games that leave a lasting impact on others.

EDUCATION

- | | | |
|----------------|--|----------------|
| 2022 – Present | University of Lodz faculty of Computer Science Currently studying Computer Science, taking courses like AI in Computer Games, Game Development in Unity, and Vector Graphics. Had been actively involved in multiple team projects, gaining hands-on experience in game development and software design. | Lodz, Poland |
| 2019 – 2021 | Computer Academy "STEP" Gained foundational knowledge in programming, learning HTML, CSS, and JavaScript. | Odesa, Ukraine |
| 2015 – 2017 | Computer Courses in the training center "SHKG" | Odesa, Ukraine |

PROJECTS

- | | | |
|-------------|--|----------------|
| 2024 – 2025 | Project on Godot with Smarter AI Enemies Developing a game in Godot with AI-driven enemies using pathfinding and a state machine to gain a better understanding of AI in video games. Godot / GDScript | Finished |
| 2024 | Bouquet Delivery Application Working on a fully functional application that allows users to order flowers for a specific date, access special deals, and customize their orders. The project focuses on improving the user experience and streamlining the ordering process. Android Studio / Firebase / Kotlin | In Development |
| 2024 | Personal Portfolio Webpage Creating a personal portfolio website to showcase my projects, skills, and experience in an interactive and visually appealing way. HTML / CSS / JS | Final Stage |
